The full moon revealed her humanity. Now the hunters know her secret.

Skinshifters are a curse. The Asheken deadwalkers proved that fact when they used skinshifters to spy against the Sylvan races during the Second War of Ages. Now, after three centuries of peace, the deadwalkers have found a secret way back onto the Sylvan Continent and this time they seek not just to conquer their enemies, but to enslave them body and soul.

When the Feliconas Clan suffers the deadwalkers' first raid, one werecat—a skinshifter who has concealed her abilities—survives the massacre. Even as Katja struggles with her grief and guilt over her murdered kin, she must unite with other Sylvan refugees to defeat the deadwalkers before they can butcher and defile the other races. But can this skinshifter trust her newfound allies or will their secrets prove even more treacherous than her own?
